REQUEST FOR RECONSIDERATION

MAIL STOP AMENDMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This is responsive to the Office Action dated April 16, 2008.

For the reasons set forth below, it is submitted that Claims 10, 15 and 16 are not anticipated by Himmel '441. It is requested that the Examiner reconsider and withdraw the rejection.

The claims call for the data requesting device transmitting to the data preparing device a list of useable display formats for the data requesting device. It is important to note that the list of useable display formats is transmitted from the data requesting device to the data preparing device. Himmel does not disclose the order of information flow and does not disclose that a list of useable display formats is sent by the data requesting device. Himmel describes a multilevel procedure for selecting the proper HTML page to be sent in response to a request. The first level is attempting to identify the client device by utilizing the HTTP header information. Note that there is no disclosure that the header information provides a list of useable display devices. If this is unsuccessful, then the client-smart agent downloads a client-snooper agent 159 to the client device to obtain information about the client device to chose an appropriate web page.
